

Il resto è giusto!

Gioco a coppie

Ogni giocatore prende:

- una scheda
- un pennarello cancellabile.

A turno i giocatori pescano una carta-oggetto da acquistare e la mettono in vista.

I due giocatori:

- scrivono il costo dell'acquisto sulla propria scheda
- mettono una spunta sulla moneta/banconota da usare
 - **regola importante:** si paga con una sola moneta/banconota
- calcolano il resto e lo scrivono.

Con la calcolatrice viene controllato che il resto sia corretto.

Prende un punto chi ha calcolato bene.

Versione sul quaderno: invece delle schede plastificate si può preparare sul quaderno una tabella dove appuntare via via i risultati:

DA COMPRARE	COSTO	PAGO CON...	RESTO	PUNTO PRESO?
astuccio	13,00 €	20 €	7,00 €	X

Livelli di difficoltà:

Livello 1 → carte col bordo **nero**

Livello 2 → carte col bordo **viola**

- → carte col bordo **rosso** (non hanno il prezzo indicato, chi pesca la carta decide il prezzo).

Il resto è giusto!

Istruzioni per la costruzione dello strumento:

- Stampare le istruzioni (io le ho plastificate e piegate a metà per farle stare dentro la scatola del gioco; se la piega viene fatta prima della plastificazione è poi facile ribadirla una volta plastificato il foglio).
- Stampare questa pagina, togliere questa parte di istruzioni per la costruzione e usarla come 'copertina' del gioco, attaccandola sulla scatola
- Stampare e plastificare le schede e le carte-oggetto; ritagliare il tutto.

Quanto costa? _____ €

Pago con:

1 € <input type="checkbox"/>	10 € <input type="checkbox"/>	100 € <input type="checkbox"/>
2 € <input type="checkbox"/>	20 € <input type="checkbox"/>	200 € <input type="checkbox"/>
5 € <input type="checkbox"/>	50 € <input type="checkbox"/>	500 € <input type="checkbox"/>

Di resto devono darmi:
